State University of Western Paraná (UNIOESTE) Cascavel, PR - Brazil Bachelor of Computer Science February 2007 - December 2013

Professional Experience

Video Game Developer Intern

ZombieCraft | Ottawa, Canada (Remote) July 2025 - September 2025

- Collaborated with a development team to design and implement new features, maps, and elements for a Minecraft server with a large user base.
- Developed new tools for the Spigot/Minecraft server using Kotlin.
- Managed and versioned code using Git/GitHub, including creating and managing branches and tags.
- Investigated and resolved bugs and issues from a Trello-based task planning system.

Consultant Analyst Programmer *Les Services Conseils Systematix INC. (SCS) | Quebec, QC, Canada June 2018 - October 2022*

- Served as a consultant on three separate projects, demonstrating expertise in full-stack development.
- Delivered high-quality, clean code that adhered to Object-Oriented Programming (OOP) and SOLID principles across all projects.

Mandates as a Consultant:

- **Analyst Programmer at Revenu Québec** (June 2018 – October 2022)
 - Performed functional and software analysis for new features and user stories in a 5-person team.
 - Developed and documented tasks using C#.
 - Conducted code reviews to ensure code quality and maintainability.
 - Provided technical support for the team and project.
- **Analyst Programmer at Directeur Général des Élections du Québec (DGEQ)** (April 2021 – March 2022)
 - Developed and maintained Java (GWT) units for the project.
 - Investigated and resolved production anomalies.
- **Analyst Programmer at Université Laval** (June 2018 – February 2022)
 - Modeled software components for a project with a team of 7-8 developers.
 - Programmed both front-end (Vue.js) and back-end (Java) components.
 - Conducted unit testing (JUnit) and code reviews.
 - Created and maintained the database (SQL) and managed version control with Git.

Analyst Programmer Top Data | Curitiba, Brazil November 2016 – April 2018

- Developed full-stack web applications using AngularJS (front-end) and Java (back-end).
- Modeled software components and performed unit testing (JUnit).
- Created and maintained databases (SQL, MSSQL).
- Contributed to code reviews and managed version control using Git.

Analyst Programmer Central Server | Curitiba, Brazil February 2014 – June 2016

- Developed and updated the client portal using PHP.
- Programmed back-end logic using Perl and VBScript.
- Created and maintained the PostgreSQL database.
- Trained new employees on team processes and project codebase.

Analyst Programmer WealthSystems | Cascavel, Brazil December 2011 – March 2013

- Developed Android applications using Java/Android Studio.
- Programmed system requirements and updated company software, ensuring its integrity and usability.
- Managed a team of junior employees.
- Programmed back-end systems using Java, Spring, and Hibernate.
- Conducted code reviews and managed version control with SVN.
